SUMMARY

Second-year B.Sc. student in Computer Science graduating in 2028. Participant in the "Atidim" excellence program. Seeking a student role in central or southern Israel. Basmach DevOps graduate with nearly 3 years of Full-Stack & DevOps experience in Ofek 324.

EDUCATION

Ben-Gurion University | B.Sc. in Computer Science

Nov 2024 – Present

- **Relevant Courses:** Data Structures (100), Logic & Set Theory (98), Extended System Programming Laboratory (89), Systems Programming (88), Discrete Structures and Combinatorics (88), Principles of Programming Languages (82).
- **Status:** Completed 2nd year (4 semesters remaining); expected graduation 2028.

Basmach – IDF School of Computer Science | DevOps Course

Aug 2020 – Dec 2020

- Linux internals, Python and Bash scripting, network protocols, and container orchestration (Docker, Kubernetes).

EXPERIENCE

Full-Stack Developer | Ofek 324 Unit (IAF)

Dec 2021 – Sep 2023

- Developed a central organizational web platform that digitized and automated critical service workflows across the Air Force.
- Built back-end services (primary focus) and front-end components using Angular.
- **Technologies:** C#, TypeScript, Angular, SQL.

DevOps Developer | Ofek 324 Unit (IAF)

Dec 2020 – Dec 2021

- Maintained deployment environments and server-side infrastructure across Linux servers, automating recurring operational tasks with Bash and PowerShell.
- Monitored system health with Splunk and contributed to version control (Git) and CI workflows (Jenkins).
- **Technologies:** Linux, Bash, PowerShell, Git, Jenkins, Splunk.

PROJECTS

DJ Track Session Manager - C++ [\[GitHub\]](#)

- Built a C++ audio processing engine with a custom LRU cache and strict manual memory management, delivering leak-free, high-performance playlist sessions under repeated load.

World Cup 2026 Informer - C++ / Java [\[GitHub\]](#)

- Implemented a real-time STOMP messaging system: a thread-safe Java server paired with a multithreaded C++ client, handling high-concurrency TCP communication without race conditions.

Linear Algebra Engine - Java [\[GitHub\]](#)

- Designed and optimized a multithreaded task scheduler that evaluates complex mathematical expressions in parallel over shared memory, eliminating data races while maximizing throughput.

TECHNICAL SKILLS

- **Languages:** Python, C++, Java, C#, SQL, Bash, TypeScript, JavaScript.
- **Systems & Concurrency:** Manual memory management, multithreading and thread safety, Linux environments.
- **Tools & Environments:** Linux, Git, Bash and PowerShell scripting, relational databases (SQL).
- **Core CS:** Data structures, algorithms, object-oriented design, software design principles.

VOLUNTEERING

English Tutor

Nov 2024 – Present

- Adapted teaching methods for children and seniors to improve conversational fluency.

Shift Manager & Lab Technician | FixIt Lab (Net@ - Appleseeds)

Sep 2016 – Jun 2020

- Managed shifts and repaired PC hardware; awarded a Ministry of Education Certificate of Excellence for social involvement.

LANGUAGES

Hebrew – Native | English – Full Professional Proficiency
